

The first startup accelerator offering access to high-level Industry 4.0 customers

Bind 4.0 is a public-private acceleration programme that lasts 24 weeks and takes place in the Basque Country. It focuses on Industry 4.0 early-stage startups involved in big data, additive manufacturing, artificial vision, cloud computing, augmented reality, cybersecurity, cyberphysical systems and/or collaborative robotics.

Startups may apply from anywhere in the world and will have a strong commitment to accelerate their business in the Basque ecosystem. Bind 4.0 will help them market their solutions. We believe that once a startup has found a market, its growth and fund-raising will come easily.

Value offer

Up to €75,000 contract

A contract with one of our **top industry firm** partners for the development of an Industry 4.0 project.

Support Services

World-class mentoring, excellent education, access to finance (up to 500,000€), demo day and participation in a top Industry 4.0 event.

Networking

Close contact with the Basque Country startup and industry ecosystem, which is one of the strongest in Europe. Visits and networking meetings will be arranged.

No equity taken

Bind 4.0 is a public-private programme whose goal is to attract and accelerate startups in the Basque region. There are no charges, nor is equity taken from participating startups.

Partners

Bind 4.0's partners are some of the world's leading companies in the Industry 4.0 arena
