

Job Announcement

Student Assistant (Studentische Hilfskraft) 40h/month

Department of General Psychology, Prof. Dr. Roland Fleming

Job Summary:

The team of Prof. Dr. Roland Fleming is seeking applications from BA or MA Psychology students (3rd semester or later) interested in working as a Student Assistant. The paid position averages about 40h/month. Details of the position, qualifications, and how to apply as follows. In general, the position is an excellent opportunity to learn running psychological experiments. The research focus of the team is on 2D and 3D shape perception and material perception.

Responsibilities:

- Recruitment and scheduling of experimental participants.
- Data collection.
- Participation in regular team meetings.
- Maintaining the web presence of the team.

Qualifications:

- Good English and German language skills.
- Be dependable, motivated, flexible, and willing to make at least a six-month commitment to the position.
- Be skilled at working autonomously and as a team member.
- Basic expertise in General Psychology is desirable.

How to apply:

Your application materials should include a course list with your psychology courses and grades as well as a list of all your computer-based skills (including web site development skills if applicable).

Please submit materials in a single PDF file entitled with your first and last name via email to Philipp Schmidt (filipp.schmidt@psychol.uni-giessen.de). Interviews will be scheduled with qualified applicants.

Deadline:

For full consideration, application materials must be received by October 31, 2014 at 8:00 a.m.
