

International Symposium for High-Performance Thin-Layer Chromatography (HPTLC 2017)

The **International Symposium for High-Performance Thin-Layer Chromatography (HPTLC 2017)** will take place in **Berlin, Germany, 4–8 July 2017**.

Progress and innovation are rarely found on the well-trodden path of a known scientific routine. Inspiration comes from the cross pollination of ideas from multiple fields and institutions, it is this spirit of

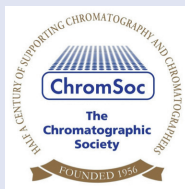

scientific community we seek to evoke at **HPTLC 2017**. See firsthand the continuing evolution of high-performance thin-layer chromatography into a modern and powerful tool with broad applicability throughout laboratory science.

If you are interested in what HPTLC could do for your laboratory, or simply want to update your understanding of methods employing this technique, then **HPTLC 2017** is the venue for you. The symposium showcases the most up to date research methods with the latest proven applications, highlighting recent instrumental advances as well as advances in automation and data analysis. A series of advanced training courses in cutting edge techniques are also available, along with a social program to promote networking and contact with thought leaders.

Interested in expertise in HPTLC? Food chemists can obtain 30 ZFL credit points when visiting **HPTLC 2017**. The AK Separation Science of the GDCh division Analytical Chemistry offers funding for poster presenters. Last minute poster presentations will still be accepted and included in the book of abstracts.

ChromSoc's Spring Symposium 2017: Supercritical Fluid and Ultra-High Performance Chromatography

ChromSoc's Spring Symposium will take place in **Sandwich, Kent, UK, 15–17 May 2017**. The symposium will feature oral presentations by leading practitioners of SFC and UHPLC. The latest innovations and applications will be described and the lectures will be augmented and supported by a comprehensive table top exhibition of instrumentation and

consumables.

Held over 3 days at The Discovery park, the event will feature 30 lectures with plenty of time allowed for discussions and questions both at exhibitors' stands and in the lecture theatre. Additional scientific, technical, practical, and computational demonstrations from our sponsoring companies will augment the programme, with 16 exhibition table top displays available throughout the event.

Exhibition set-up and delegate registration will be on **Monday 15th May 2017** and a buffet lunch will be provided around midday. The scientific sessions will start on Monday afternoon with a specialised workshop on CHROMacademy software by Crawford Scientific followed by a "How to do it tips and tricks" demonstration at Jaytee's lab located close by on the Discovery Park site.

The meeting is supported by scientists from across Europe and USA, including Dr Roman Szucs of Pfizer UK who will be hosting sessions and helping in the coordination of the event at The Discovery Centre.

ChromSoc Bursaries are available for this event: www.chromsoc.com/academic-support.aspx

For further information on the meeting's registration, table-top exhibiting, the social event, sponsorship or payment details please visit: www.chromsoc.com/resources/1/meetings/2017/Spring%20flier.pdf
