# Affluence and Freedom: An Environmental History of Political Ideas

**Item Type** Book

**Author** Pierre Charbonnier

**Author** Andrew Brown

**Abstract** In this pathbreaking book, Pierre Charbonnier opens up a new intellectual terrain: an environmental history of political ideas. His aim is not to locate the seeds of ecological thought in the history of political ideas as others have done, but rather to show that all political ideas, whether or not they endorse ecological ideals, are informed by a certain conception of our relationship to the Earth and to our environment. The fundamental political categories of modernity were founded on the idea that we could improve on nature, that we could exert a decisive victory over its excesses and claim unlimited access to earthly resources. In this way, modern thinkers imagined a political society of free individuals, equal and prosperous, alongside the development of industry geared towards progress and liberated from the Earth's shackles. Yet this pact between democracy and growth has now been called into question by climate change and the environmental crisis. It is therefore our duty today to rethink political emancipation, bearing in mind that this can no longer draw on the prospect of infinite growth promised by industrial capitalism. Ecology must draw on the power harnessed by nineteenth-century socialism to respond to the massive impact of industrialization, but it must also rethink the imperative to offer protection to society by taking account of the solidarity of social groups and their conditions in a world transformed by climate change. This timely and original work of social and political theory will be of interest to a wide readership in politics, sociology, environmental studies and the social sciences and humanities generally.

## After Nature: A Politics for the Anthropocene

**Item Type** Book

**Author** Jedediah Purdy

**Abstract** Nature no longer exists apart from humanity. Henceforth, the world we will inhabit is the one we have made. Geologists have called this new planetary epoch the Anthropocene, the Age of Humans. The geological strata we are now creating record industrial emissions, industrial-scale crop pollens, and the disappearance of species driven to extinction. Climate change is planetary engineering without design. These facts of the Anthropocene are scientific, but its shape and meaning are questions for politics—a politics that does not yet exist. After Nature develops a politics for this post-natural world. Jedediah Purdy begins with a history of how Americans have shaped their landscapes. He explores the competing traditions that still infuse environmental law and culture—a frontier vision of settlement and development, a wilderness-seeking Romanticism, a utilitarian attitude that tries to manage nature for human benefit, and a twentieth-century ecological view. These traditions are ways of seeing the world and humans' place in it. They are also modes of lawmaking that inscribe ideal visions on the earth itself. Each has shaped landscapes that make its vision of nature real, from wilderness to farmland to suburbs—opening some new ways of living on the earth while foreclosing others. The Anthropocene demands that we draw on all these legacies and go beyond them. With human and environmental fates now inseparable, environmental politics will become either more deeply democratic or more unequal and inhumane. Where nothing is pure, we must create ways to rally devotion to a damaged and ever-changing world.

## Anthropocene Encounters: New Directions in Green Political Thinking

**Item Type** Book

**Editor** Frank Biermann

**Editor** Eva Lövbrand

**Abstract** Coined barely two decades ago, the Anthropocene has become one of the most influential and controversial terms in environmental policy. Yet it remains an ambivalent and contested formulation, giving rise to a multitude of unexpected, and often uncomfortable, conversations. This book traces in detail a broad variety of such 'Anthropocene encounters': in science, philosophy and literary fiction. It asks what it means to 'think green' in a time when nature no longer offers a stable backdrop to political analysis. Do familiar political categories and concepts, such as democracy, justice, power and time, hold when confronted with a world radically transformed by humans? The book responds by inviting more radical political thought, plural forms of engagement, and extended ethical commitments, making it a fascinating and timely volume for graduate students and researchers working in earth system governance, environmental politics and studies of the Anthropocene. This is one of a series of publications associated with the Earth System Governance Project. For more publications, see [www.cambridge.org/earth-system-governance](http://www.cambridge.org/earth-system-governance).

## Äquivalenz der Katastrophen: nach Fukushima

**Item Type** Book

**Author** Jean-Luc Nancy

**Author** Thomas Laugstien

**Abstract** Die Katastrophe von Fukushima ist zum Sinnbild einer unkontrollierbaren Wechselwirkung zwischen sogenannten »Naturkatastrophen« und technischen, sozialen, politischen und ökonomischen Faktoren in einer globalisierten Welt geworden. Sicher sind nicht alle Katastrophen gleich, und doch gibt es eine gewisse Äquivalenz der Katastrophen, deren Träger und Zeichen das Geld, der Marktwert ist. Diese »allgemeine Äquivalenz« lässt alle Elemente, die unsere Existenz stiften – Güter, Kräfte, Energien – unterschiedslos und unbegrenzt in Konsum und Kommunikation zirkulieren. Während wir so einem generellen Zustand der Katastrophe entgegengehen, stellt sich immer dringender die Frage, was »Denken« und »Handeln« heute noch leisten können.

## Around the Day in Eighty Worlds: Politics of the Pluriverse

**Item Type** Book

**Author** Martin Savransky

**Abstract** "Around the Day in Eighty Worlds advances a new speculative interpretation of the philosophy of William James to develop a runaway metaphysics, a radical pluralism of reality. The author weaves together ethnographic storytelling with philosophical experimentation to dramatize a politics of the pluriverse under the question "what is reality capable of?" Around the Day in Eighty Worlds makes proposals that take us beyond contemporary debates on the politics of radical difference in postcolonial studies, cultural anthropology, and theory and philosophy"--

# Auffällig unauffällig? Wahrnehmungen, Mediennutzung und politische Einstellungsmuster im Ruhrgebiet

**Item Type** Book

**Editor** Bodo Hombach

**Editor** Rolf G. Heinze

**Editor** Michael Hüther

**Abstract** Das Ruhrgebiet befindet sich in einem stetigen wirtschaftlichen Strukturwandel. Diese Studie beleuchtet politische Einstellungen und Wahrnehmungen der Menschen im Ruhrgebiet und geht dabei der Frage nach, ob sogenannte „abgehängte Regionen“ besonders anfällig für gesellschaftspolitische Apathie und Unzufriedenheit sind. Dabei zeichnet die Studie soziale Dynamiken nicht nur sozialräumlich nach und setzt sie mit politischen und medialen Kontexten in Verbindung, vielmehr arbeitet sie Bausteine einer den sozialen Zusammenhalt fördernden Transformationsstrategie, hin zu einem neuen Gesellschaftsvertrag, heraus. Es entsteht das Bild einer auffällig widerstandsfähigen Region. Neben vergleichbar deindustrialisierten Gebieten ist das Ruhrgebiet damit ein absoluter Einzelfall.

# Between Gaia and Ground: Four Axioms of Existence and the Ancestral Catastrophe of Late Liberalism

**Item Type** Book

**Author** Elizabeth A. Povinelli

**Abstract** "Between Gaia and Ground examines four axioms of existence that have emerged in recent years across a significant segment of critical theory: the entanglement of existence; the unequal distribution of power to affect the local and transversal terrains of this entanglement; the multiplicity and collapse of the event as the sine qua non of political thought; and the racial and colonial history that informed modern western ontologies and epistemologies and the concept of the west as such. Beyond these axioms, Between Gaia and Ground is interested in the broader anticolonial struggles from which they emerged and a reactionary formation, late liberalism, which has attempted to remold, blunt, and redirect these struggles in the context of contemporary climatic, environmental, viral and social collapse. Elizabeth Povinelli treats these axioms as distinct theoretical statements, demonstrating that they are part of much broader discursive surfaces reflecting opposing currents in the direction of political thought and action in the wake of geontopower. Between Gaia and Ground seeks to show how a seemingly casual syntactic arrangement of theoretical statements results in dramatically differing paradigms for figuring the present as a coming catastrophe (l'catastrophe à venir) and as an ancestral one (l'catastrophe ancestral/histoire)"--

## Breaking News: The Remaking of Journalism and Why It Matters Now

**Item Type** Book  
**Author** Alan Rusbridger  
**Abstract** How do we know any more what is true and what isn't? We are living through the greatest communication revolution since Gutenberg in which falsehood regularly seems to overwhelm truth. In *Breaking News* Alan Rusbridger offers an urgent and agenda-setting examination of the past, present and future of the press, and the forces menacing its freedom. The news media have been disrupted by huge and fast-moving changes. The growth of social media and with it the ability of billions of people to publish has created a vast amount of unreliable and false news which now competes with, and sometimes drowns, more established forms of journalism. The President of the United States regularly lies to the public and brands his critics 'fake'. Politicians openly rubbish the views of 'so-called experts'. Where can we look for reliable, verifiable sources of news and information? What does all this mean for democracy? And what will the future hold? Reflecting on his twenty years as editor of the *Guardian*; and his experience of breaking some of the most significant news stories of our time, including the Edward Snowden revelations, phone-hacking, WikiLeaks and the Keep it in the Ground campaign, Rusbridger answers these questions and offers a stirring defence of why quality journalism matters now more than ever.

## Ch'ixinakax utxiwa: eine Reflexion über Praktiken und Diskurse der Dekolonisierung

**Item Type** Book

**Author** Silvia Rivera Cusicanqui

**Editor** Sebastian Garbe

**Editor** María Cárdenas

**Editor** Andrea Sempértegui

**Abstract** Silvia Rivera Cusicanqui entwickelt in drei Essays eine neue, radikal dekoloniale Perspektive auf die bolivianische Gesellschaft. Im ersten Essay schließt sie ausgehend von den Kämpfen 2000–2005 auf die indigenen Aufstände von 1781, die sie dem indigenen, spiralförmigen Zeitverständnis folgend verbindet. Im zweiten Essay entwickelt sie anhand der Interpretation der Zeichnungen des Chronisten Wuman Puma de Ayala aus dem 17. Jahrhundert eine ›Sociología de la imagen‹, eine Bildsoziologie. Sie macht klar, wie die Kolonisierung und die Übernahme der Kolonialsprache die Interpretation der Welt und das eigene Denk- und Wertesystem verändert hat und soziale Missstände so nicht mehr denk- und ansprechbar sind. Bilder und deren Interpretation ermöglichen eine alternative Betrachtung der Verhältnisse und beinhalten dadurch enormes emanzipatives Potenzial. Im dritten Teil setzt sich Cusicanqui mit der Geschichte der vermeintlichen ›Inklusion‹ indigener Menschen auseinander und übt Kritik an gängigen Theorien wie dem Multikulturalismus, aber auch der Dekolonisierungstheorie. Beide sind nicht nur durchzogen von elitären Strukturen und Teil eines internen Kolonialismus, sondern auch unfähig, von der Theorie in eine dekoloniale Praxis überzuleiten. Auf den letzten Seiten umreißt die Autorin das Konzept des Ch'ixi, vereinfacht gesprochen, die Anwesenheit zweier Komponenten, die sich vermischen, ohne sich dabei aufzulösen. Ergänzt wird das Buch durch Cusicanquis umfangreichen und bislang ebenfalls unveröffentlichten Artikel »Der Rechtediskurs und die Paradoxe postkolonialer Moderne«.

## Climate Leviathan: A Political Theory of Our Planetary Future

**Item Type** Book

**Author** Joel Wainwright

**Author** Geoff Mann

**Abstract** Despite all the science and summits, leading capitalist states have not managed to mitigate anything close to an adequate level of carbon emissions. There is no way the world will warm less than the critical 2C threshold. What are the likely political-economic outcomes? Where is our warming world headed? Possibilities in the struggle for climate justice depend on our capacity to anticipate where the existing global order is likely to go. Climate Leviathan provides a radical way of thinking about how environmental change will intensify existing challenges to the global order, unearthing the forces for a planetary variation on existing forms of sovereignty.

## Controversy Mapping: A Field Guide

**Item Type** Book

**Author** Tommaso Venturini

**Author** Anders Kristian Munk

**Abstract** As disputes concerning the environment, the economy, and pandemics occupy public debate, we need to learn to navigate matters of public concern when facts are in doubt and expertise is contested. Controversy Mapping is the first book to introduce readers to the observation and representation of contested issues on digital media. Drawing on actor-network theory and digital methods, Venturini and Munk outline the conceptual underpinnings and the many tools and techniques of controversy mapping. They review its history in science and technology studies, discuss its methodological potential, and unfold its political implications. Through a range of cases and examples, they demonstrate how to chart actors and issues using digital fieldwork and computational techniques. A preface by Richard Rogers and an interview with Bruno Latour are also included. A crucial field guide and hands-on companion for the digital age, Controversy Mapping is an indispensable resource for students and scholars of media and communication, as well as activists, journalists, citizens, and decision makers.

## Down to Earth: Politics in the New Climatic Regime

**Item Type** Book

**Author** Bruno Latour

**Abstract** The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been extremely slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization—and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

# Ecomodernism: Technology, Politics and the Climate Crisis

**Item Type** Book

**Author** Jonathan Symons

**Abstract** Is climate catastrophe inevitable? In a world of extreme inequality, rising nationalism and mounting carbon emissions, the future looks gloomy. Yet one group of environmentalists, the 'ecomodernists', are optimistic. They argue that technological innovation and universal human development hold the keys to an ecologically vibrant future. However, this perspective, which advocates fighting climate change with all available technologies – including nuclear power, synthetic biology and others not yet invented – is deeply controversial because it rejects the Green movement's calls for greater harmony with nature. In this book, Jonathan Symons offers a qualified defence of the ecomodernist vision. Ecomodernism, he explains, is neither as radical or reactionary as its critics claim, but belongs in the social democratic tradition, promoting a third way between laissez-faire and anti-capitalism. Critiquing and extending ecomodernist ideas, Symons argues that states should defend against climate threats through transformative investments in technological innovation. A good Anthropocene is still possible – but only if we double down on science and humanism to push beyond the limits to growth.

# Environmental Human Rights in Earth System Governance: Democracy beyond Democracy

**Item Type** Book

**Author** Walter Baber

**Author** Robert V. Bartlett

**Abstract** Environmental rights are a category of human rights necessarily central to both democracy and effective earth system governance (any environmental-ecological-sustainable democracy). For any democracy to remain democratic, some aspects must be beyond democracy and must not be allowed to be subjected to any ordinary democratic collective choice processes shy of consensus. Real, established rights constitute a necessary boundary of legitimate everyday democratic practice. We analyze how human rights are made democratically and, in particular, how they can be made with respect to matters environmental, especially matters that have import beyond the confines of the modern nation state

## Futurability: The Age of Impotence and the Horizon of Possibility

**Item Type** Book

**Author** Franco Berardi

**Abstract** We live in an age of impotence. Stuck between global war and global finance, between identity and capital, we seem to be incapable of producing that radical change that is so desperately needed. Is there still a way to disentangle ourselves from a global order

that shapes our politics as well as our imagination? In his most systematic book to date, renowned Italian theorist Franco Berardi Bifo tackles this question through a solid yet visionary analysis of the three fundamental concepts of Possibility, Potency, and Power. Overcoming any temptation of giving in to despair or nostalgia, Berardi proposes the notion of Futurability as a way to remind us that even within the darkness of our current crisis, still lies dormant the horizon of possibility.

## Global Space Governance: An International Study

**Item Type** Book

**Editor** Ram S. Jakhu

**Editor** Joseph N. Pelton

**Abstract** This book is based on the findings, conclusions and recommendations of the Global Space Governance study commissioned by the 2014 Montreal Declaration that called upon civil society, academics, governments, the private sector, and other stakeholders to undertake an international interdisciplinary study. The study took three years to complete. It examines the drivers of space regulations and standards, key regulatory problems, and especially addresses possible improvements in global space governance. The world's leading experts led the drafting of chapters, with input from academics and knowledgeable professionals in the public and private sectors, intergovernmental

organizations, and nongovernmental organizations from all the regions of the world with over 80 total participants. This book and areas identified for priority action are to be presented to the UN Committee on the Peaceful Uses of Outer Space and it is hoped will be considered directly or indirectly at the UNISPACE+50 event in Vienna, Austria, in 2018. The report, a collective work of all the contributors, includes objective analysis and frank statements expressed without pressure of political, national, and occupational concerns or interest. It is peer-reviewed and carefully edited to ensure its accuracy, preciseness, and readability. It is expected that the study and derivative recommendations will form the basis for deliberations and decisions at international conferences and meetings around the world on the theme of global space governance. This will hopefully include future discussion at the UN Committee on the Peaceful Uses of Outer Space.

## Hope in the Anthropocene: Agency, Governance and Negation

**Item Type** Book

**Editor** Valerie Waldow

**Editor** Pol Barga es-Pedreny

**Editor** David Chandler

**Abstract** Explores the centrality of hope to political thought and policy practice in the Anthropocene - Examines topical concerns of the Anthropocene including a loss of belief in human exceptionalism and in a telos of progress - Engages with hope conceptually and materially rather than merely as a positive attitude of mind - Draws on contemporary theoretical approaches, including drawing upon - Critical, Feminist, Black, and Indigenous studies - Uses contemporary empirical and policy examples including environmental issues of land use and extraction and Covid governance - Takes an interdisciplinary approach, including expertise from the fields of geography, law, politics, and international relations New modes of Hope have emerged in the Anthropocene, increasingly grounded in an ethics of attentiveness and responsibility. Through incorporating contemporary approaches to both theory and policy practice, including critical, feminist, black and indigenous perspectives, this book analyses how Hope works with the uncertainties and interdependencies of human agency and interaction. It draws out the problems of integrating Hope into governance and policy management, and engages with Hope as a potentially negating force, in a world which can be seen as one of unending catastrophe.

## International Relations Theories: Discipline and Diversity

**Item Type** Book  
**Editor** Timothy Dunne  
**Editor** Milja Kurki  
**Editor** Katarina Kušić  
**Editor** Steve Smith  
**Abstract** Expert line-up of contributors offer coverage of dominant and emerging theories and arguments from diverse perspectives Includes coverage of historically marginalised theories, including postcolonialism and environmentalism A case study in each chapter shows how theory can be used to explain real-world problems and dilemmas and additional questions to encourage students to analyse and evaluate the different theories for themselves Boxes highlighting key books or articles introduce students to prominent works in the field to encourage wider reading and research interests New to this Edition: An enhanced ebook with author videos, self-test questions, and pointers to answering case study questions Newly authored chapters on classical realism, liberalism, and Marxism provide students with fresh perspectives on these theories Newly authored chapter on critical theories illustrates the intersectional nature of

critical theories as it relates to gender, race, and decolonisation, while speaking to topical debates in the field The global IR chapter has been moved to the beginning of the text, which encourages students to critically reflect on the context in which IR developed and appreciate the importance of viewing international relations theories from truly representative perspectives from the very start Updated online resources include pointers on answering case study questions, supporting students to apply theories to real world issues

## Justice for Earthlings: Essays in Political Philosophy

**Item Type** Book  
**Author** David Miller  
**Abstract** In the past few decades social changes have impacted how we understand justice, as societies become both more multicultural and more interconnected globally. Much philosophical thought, however, seems to proceed in isolation from these developments. While philosophers from Plato onwards have portrayed justice as an abstract, universal ideal, Miller argues that principles of justice are always rooted in particular social contexts, and connects these ideas to the changing conditions of human life. In this important contribution to political philosophy, it is argued that philosophers need to pay more attention to the way that people actually think about what's fair, and only defend principles that are feasible to apply in the real world. To understand equality of opportunity, for example, we must explore the cultural constraints that people face when presented with life choices. Justice for Earthlings

also explains how national boundaries make justice at global level different from social justice.

## Kant's Grounded Cosmopolitanism: Original Common Possession and the Right to Visit

**Item Type** Book  
**Author** Jakob Huber  
**Abstract** Two kinds of cosmopolitan vision are typically associated with Kant's practical philosophy: on the one hand, the ideal of a universal moral community of rational agents who constitute a 'kingdom of ends' qua shared humanity. On the other hand, the ideal of a distinctly political community of 'world citizens' who share membership in some kind of global polity. Kant's Grounded Cosmopolitanism introduces a novel account of Kant's global thinking, one that has hitherto been largely overlooked: a grounded cosmopolitanism concerned with spelling out the normative implications of the fact that a plurality of corporeal agents concurrently inhabit the earth's spherical surface. It is neither concerned with a community of shared humanity in the abstract, nor of shared citizenship, but with a 'disjunctive' community of earth dwellers, that is, embodied agents in direct physical confrontation with each other. Kant's grounded cosmopolitanism as laid out in the Doctrine of Right frames the question how individuals relate to one another globally by virtue of concurrent existence and derives from this a specific set of constraints on cross-border interactions.

## Law and the Kinetic Environment: Regulating Dynamic Landscapes

**Item Type** Book

**Author** Sarah Marusek

**Abstract** This book addresses the legal-geographical implications of the fact that landscapes are not static, but dynamic. Within the field of legal geography, the spatial relationship of law to landscape is usually considered to be static. Environments are often considered fixed, and consequently inert, as places that literally don't go anywhere. Typically, then, it is what happens in these places, rather than the place itself, that commands academic attention. In contrast to this static viewpoint, *Law and the Kinetic Environment* considers how many landscapes are in flux and, as a result, may be seen as dynamic. Natural phenomena, such as oozing lava, moving glaciers, or bubbling geothermal pools, challenge and test the normative conceptualizations of stability of place, property ownership, and legal regulation. Consequently, such dynamic landscapes enliven and transform law, offering new jurisprudential insights into what law is and how it operates in response to the kineticism that, this book argues is, to some degree, inherent in all landscapes. This original engagement with legal geography will appeal to those with general interests in this area, as well as specific concerns with questions of law and place, property and the environment.

## Locating Nature: Making and Unmaking International Law

**Item Type** Book

**Editor** Usha Natarajan

**Editor** Julia Dehm

**Abstract** "For those troubled by environmental harm on a global scale and its deeply unequal effects, this book explains how international law structures ecological degradation and environmental injustice while claiming to protect the environment. It identifies how central legal concepts such as sovereignty, jurisdiction, territory, development, environment, labour, and human rights make inaccurate and unsustainable assumptions about the natural world and systemically reproduce environmental degradation and injustice. To avert socioecological crises, we must not only unpack but radically rework our understandings of nature and its relationship with law. We propose more sustainable and equitable ways to remake law's relationship with nature by drawing on diverse disciplines and sociocultural traditions that have been marginalized within international law. Influenced by TWAIL, postcolonialism, and decoloniality, and inspired by Indigenous knowledges, cosmology, mythology and storytelling, this book lays the groundwork for an epistemological shift in the way humans conceptualize the relationship between law and nature"--

## Multiplicity: A New Common Ground for International Relations?

**Item Type** Book

**Editor** Justin Rosenberg

**Editor** Milja Kurki

**Abstract** This volume takes up the idea of 'multiplicity' as a new common ground for international theory, bringing together 10 scholars to reflect on the implications of societal multiplicity for areas as diverse as nationalism, ecology, architecture, monetary systems, cosmology and the history of political ideas. International relations (IR), it is often said, has contributed no big ideas to the interdisciplinary conversation of the social sciences and humanities. Yet this is an unnecessary silence, for IR uniquely addresses a fundamental fact about the human world: its division into a multiplicity of interacting social formations. This feature is full of consequences for the very nature of societies and for social phenomena of all kinds. And in recent years a research programme has emerged within IR to theorise these 'consequences of multiplicity' and to trace how the effects of the international dimension extend into other fields of social life. This book is a powerful indication of the contribution that IR may yet make to the human disciplines. The chapters in this book were originally published as a special issue of Globalizations.

## Patriotism to the Earth: A Quest for Humane Global Governance

**Item Type** Book

**Author** Richard A. Falk

**Contributor** Sasha Milonova

**Abstract** Should national security still be our biggest priority on a burning planet? And does it matter that a policy is feasible if it fails to produce an outcome that is necessary and desirable? Political realists responsible for formulating foreign policy would say yes, but in this book Richard Falk and Sasha Milonova favor reorienting our loyalties away from increasingly militarized and nationalist states towards a system of governance that gives priority to global ecological resilience. They trace the deficiencies of the existing international order from the emergence of the Westphalian framework to its entrenchment in the institutions created after World War II, and again after the Cold War, and show why it has consistently failed to generate the international cooperation and political imagination required to stall, let alone reverse, biodiversity loss, war, wealth inequality, and other challenges that credibly threaten the security of the entire planet. This book offers an original approach to international relations that adds to the management of power the distinctive issues present in the prudent management of the 'the global commons.' The work of several visionary thinkers is considered, as is crucial relevance of inter-cultural dialogue, a critical appreciation of the limits of rationality and modernity, and an ethos of compassion for the suffering of all others who cohabit the earth.

## Political Theology of International Order

**Item Type** Book

**Author** William Bain

**Abstract** Is contemporary international order truly a secular arrangement? Theorists of international relations typically adhere to a narrative that portrays the modern states system as the product of a gradual process of secularization that transcended the religiosity of medieval Christendom. William Bain challenges this narrative by arguing that modern theories of international order reflect ideas that originate in medieval theology. They are, in other words, worldly applications of a theological pattern. This ground-breaking book makes two key contributions to scholarship on international order. First, it provides a thorough intellectual history of medieval and early modern traditions of thought and the way in which they shape modern thinking about international order. It explores the ideas of Augustine, Thomas Aquinas, William of Ockham, Martin Luther, and other theologians to rise above the sharp differentiation of medieval and modern that underpins most international thought. Uncovering this theological inheritance invites a fundamental reassessment of canonical figures, such as Hugo Grotius and Thomas Hobbes, and their contribution to theorizing international order. Second, this book shows how theological ideas continue to shape modern theories of international order by structuring the questions theorists ask as well as the answer they provide. It argues that the dominant vocabulary of international order, system and society, anarchy, balance of power, and constitutionalism, is mediated by the intellectual commitments of nominalist theology. It concludes by exploring the implications of thinking in terms of this theological inheritance, albeit in a world where God is only one of several possibilities that can called upon to secure the regularity of order.

## Power in the Anthropocene

**Item Type** Book

**Author** Lars Tønder

**Abstract** Power in the Anthropocene offers a unique approach to the study of power in a time of multiple ecological crises. Drawing on insights from Jane Bennett, Donna Haraway, Bruno Latour, and others, the book introduces a new materialist framework and opens up innovative avenues for expanding democracy and political mobilization. The book is the first of its kind to link the study of power to debates about the Anthropocene, and it outlines a new agenda for interdisciplinary research that combines insights from both the natural sciences and the social sciences, including ecofeminism, sustainability science, indigenous studies, and environmental political theory.

## The Anthropocene Debate and Political Science

**Item Type** Book

**Editor** Thomas Hickmann

**Abstract** Anthropocene has become an environmental buzzword. It denotes a new geological epoch that is human-dominated. As mounting scientific evidence reveals, humankind has fundamentally altered atmospheric, geological, hydrological, biospheric, and other Earth system processes to an extent that the risk of an irreversible system change emerges. Human societies must therefore change direction and navigate away from critical tipping points in the various ecosystems of our planet. This hypothesis has kicked off a debate not only on the geoscientific definition of the Anthropocene era, but increasingly also in the social sciences. However, the specific contribution of the social sciences disciplines and in particular that of political science still needs to be fully established. This edited volume analyzes, from a political science perspective, the wider social dynamics underlying the ecological and geological changes, as well as their implications for governance and politics in the Anthropocene. The focus is on two questions: (1) What is the contribution of political science to the Anthropocene debate, e.g. in terms of identified problems, answers, and solutions? (2) What are the conceptual and practical implications of the Anthropocene debate for the discipline of political science? Overall, this book contributes to the Anthropocene debate by providing novel theoretical and conceptual accounts of the Anthropocene, engaging with contemporary politics and policy-making in the Anthropocene, and offering a critical reflection on the Anthropocene debate as such. The volume will be of great interest to students and scholars of political science, global environmental politics and governance, and sustainable development.

## The Intersectional Environmentalist: How to Dismantle Systems of Oppression to Protect People + Planet

**Item Type** Book

**Author** Leah Thomas

**Abstract** "The Intersectional Environmentalist is a primer on the intersection between environmentalism, racism, and privilege, and an acknowledgment of the fundamental truth that we cannot save the planet without uplifting the voices of its people -- especially those most often unheard. Written by Leah Thomas, a prominent voice in the field and the woman who coined the term "Intersectional Environmentalism," this book is simultaneously a call to action, a guide to instigating change for all, and a pledge to work towards the empowerment of all people and the betterment of the planet"--

## The Magna Carta Manifesto: Liberties and Commons for All

**Item Type** Book

**Author** Peter Linebaugh

**Abstract** This remarkable book shines a fierce light on the current state of liberty and shows how longstanding restraints against tyranny and the rights of habeas corpus, trial by jury, and due process of law, and the prohibition of torture are being abridged. In providing a sweeping history of Magna Carta, the source of these protections since 1215, this powerful book demonstrates how these ancient rights are repeatedly laid aside when the greed of privatization, the lust for power, and the ambition of empire seize a state. Peter Linebaugh draws on primary sources to construct a wholly original history of the Great Charter and its scarcely-known companion, the Charter of the Forest, which was created at the same time to protect the subsistence rights of the poor.

## The Oxford Handbook of Energy and Society

**Item Type** Book

**Editor** Debra J. Davidson

**Editor** Matthias Gross

**Abstract** The Oxford Handbook of Energy and Society presents an overview of this expanding area that has evolved dramatically over the past decade, away from one largely dominated by structural, political economic treatments on the one hand, and social-psychological studies of individual-level attitudes and behaviors on the other, toward a far more conceptually and methodologically rich and exciting field that brings in, for example, social practices, system complexity, risk theory, social studies of science, and social movements theories. This volume seeks to capture the variety of scales and methods, and range of both conceptual and empirical analyses that define the field, while drawing particular attention to indigenous peoples, poverty, political power, communities and cities. Organized into seven sections, chapters cover social theory and energy-society relations, political-economic perspectives, consumption dynamics, energy equity and energy poverty, energy and publics, energy and governance, as well as emerging trends.

## The Oxford Handbook of Energy Politics

**Item Type** Book

**Editor** Kathleen J. Hancock

**Editor** Juliann Emmons Allison

**Abstract** "In many ways, everything we once knew about energy resources and technologies has been impacted by: the longstanding scientific consensus on climate change and related support for renewable energy; the affordability of extraction of unconventional fuels; increasing demand for energy resources by middle- and low-income nations; new regional and global stakeholders; fossil fuel discoveries and emerging renewable technologies; awareness of (trans)local politics; and rising interest in corporate social responsibility (CSR) and the need for energy justice. Research on these and related topics now appears frequently in social science academic journals-in broad-based journals, such as International Organization, International Studies Quarterly, and Review of International Political Economy, as well as those focused specifically on energy (e.g., Energy Research & Social Science and Energy Policy), the environment (Global Environmental Politics), natural resources (Resources Policy), and extractive industries (Extractive Industries and Society). The Oxford Handbook of Energy

Politics synthesizes and aggregates this substantively diverse literature to provide insights into, and a foundation for teaching and research on, critical energy issues primarily in the areas of international relations and comparative politics. Its primary goals are to further develop the energy politics scholarship and community, and generate sophisticated new work that will benefit a variety of scholars working on energy issues"--

## The Oxford Handbook of International Political Sociology

**Item Type** Book  
**Editor** Stacie E. Goddard  
**Editor** George Lawson  
**Editor** Ole Jacob Sending  
**Abstract** This handbook offers in-depth discussions of core insights and analytical tools found in International Political Sociology (IPS) scholarship. It discusses insights offered by deploying sociological theory to understand different facets of international politics. Structured around a set of defining commitments—relationalism, intersubjectivity, and historicism—the book shows what is distinct about IPS, where it came from, and where it can go next to deepen insights and engage debates beyond IPS itself. The book contains a range of chapters on different dimensions of core concepts such as power, order, resistance, and agency, showing what IPS can offer in terms of empirical insights and how it contributes to a deeper understanding of both historical and contemporary political developments.

## The Palgrave Handbook of Global Politics in the 22nd Century

**Item Type** Book

**Editor** Laura Horn

**Editor** Ayşem Mert

**Editor** Franziska Müller

**Abstract** This handbook offers a unique approach to the question: How do scholars write the future of global politics? Written in futur anterior style, around the 200-year anniversary of the birth of International Relations (IR) as an academic discipline, the contributions engage in world-building and imagine different futures of IR. Set in a multiverse, 23 chapters draw on a range of possible themes and imaginaries, for instance post-pandemic conditions, the Anthropocene, and not least academic practices and the role of researchers. A concluding chapter anchors these explorations in contemporary discussions. The book mirrors the format and style of existing handbooks, combining outlines and discussions of theories, structures, processes, and core issues in IR with an academic science fiction account of how these might play out over the course of the next century. In doing so, the book challenges IR and provides alternative imaginaries, rather than predicting future conditions for all humanity. The book invites readers to reflect on how thinking about the future has become an increasingly radical, but more than ever necessary act. Laura Horn is Associate Professor at the Department of Social Science and Business at Roskilde University, Denmark. Aysem Mert is Senior Lecturer at the Department of Political Science at Stockholm University, Sweden. Franziska Muller is Assistant Professor at the Department of Social Sciences and Business at University of Hamburg, Germany

## The Rights of Nature: A Legal Revolution That Could Save the World

**Item Type** Book

**Author** David R. Boyd

**Abstract** "Palila v Hawaii. New Zealand's Te Urewera Act. Sierra Club v Disney. These legal phrases hardly sound like the makings of a revolution, but beyond the headlines portending environmental catastrophes, a movement of immense import has been building--in courtrooms, legislatures, and communities across the globe. Cultures and laws are transforming to provide a powerful new approach to protecting the planet and the species with whom we share it. Lawyers from California to New York are fighting to gain legal rights for chimpanzees and killer whales, and lawmakers are ending the era of keeping these intelligent animals in captivity. In Hawaii and India, judges have recognized that endangered species--from birds to lions--have the legal right to exist. Around the world, more and more laws are being passed recognizing that ecosystems--rivers, forests, mountains, and more--have legally enforceable rights. And if nature has rights, then humans have responsibilities. In *The Rights of Nature*, noted environmental lawyer David Boyd tells this remarkable story, which is, at its heart, one of humans as a species finally growing up. Read this book and your world view will be altered forever."--

## The World Multiple: The Quotidian Politics of Knowing and Generating Entangled Worlds

**Item Type** Book

**Editor** Keiichi Ōmura

**Editor** Grant Otsuki

**Editor** Shiho Satsuka

**Editor** Atsurō Morita

**Abstract** The World Multiple, as a collection, is an ambitious ethnographic experiment in understanding how the world is experienced and generated in multiple ways through people's everyday practices. Against the dominant assumption that the world is a single universal reality that can only be known by modern expert science, this book argues that worlds are worlded—they are socially and materially crafted in multiple forms in everyday practices involving humans, landscapes, animals, plants, fungi, rocks, and other beings. These practices do not converge to a singular knowledge of the world, but generate a world multiple—a world that is more than one integrated whole, yet less than many fragmented parts. The book brings together authors from Europe, Japan, and North America, in conversation with ethnographic material from Africa, the Americas, and Asia, in order to explore the possibilities of the world multiple to reveal new ways to intervene in the legacies of colonialism, imperialism, and capitalism that inflict damage on humans and nonhumans. The contributors show how the world is formed through interactions among techno-scientific, vernacular, local, and indigenous practices, and examine the new forms of politics that emerge out of them. Engaged with recent anthropological discussions of ontologies, the Anthropocene, and multi-species ethnography, the book addresses the multidimensional realities of people's lives and the quotidian politics they entail. -- Provided by publisher

## Thinking World Politics Otherwise: A Diverse Introduction to International Relations

**Item Type** Book  
**Editor** Rhys Crilley  
**Editor** Nivi Manchanda  
**Editor** Laura J. Shepherd  
**Editor** Cai Wilkinson  
**Editor** Caitlin Biddolph  
**Editor** Stefanie R. Fishel

**Abstract** Thinking World Politics Otherwise is a different kind of textbook. It includes a variety of critical approaches and perspectives that seek to challenge and rethink orthodox understandings of International Relations. Moving away from traditional approaches based on theoretical and historical schools of thought, Thinking World Politics Otherwise brings together prominent voices in the field that recognize the importance of engaging with global politics from a range of perspectives and through a variety of cutting-edge approaches. It provides students with the opportunity to become familiar with a wide spectrum of approaches, issues, and cases that have been historically marginalized in the discipline.

## This Endangered Planet: Prospects and Proposals for Human Survival

**Item Type** Book

**Author** Richard A. Falk

**Abstract** Analysis of the main factors underlying the ecological crisis endangering the world environment - examines in detail four principal threats, (1) the war system and nuclear weapons, (2) population growth, (3) the depletion of natural resources, and (4) air pollution and water pollution, and includes proposals for a new international political system capable of dealing with global problems such as disarmament, population policy, pollution control, etc. References and statistical tables.

## Uniting Green Criminology and Earth Jurisprudence

**Item Type** Book  
**Author** Jack Lampkin  
**Abstract** As planet Earth continues to absorb unprecedented levels of anthropogenically induced environmental and climatic change, two similar academic schools of thought have emerged in recent years, both making sustained efforts to explain how and why this state of affairs has evolved. These two disciplines are known as green criminology and earth jurisprudence. Whilst these areas of study can be seen as sub-disciplines of their parent subjects, law and criminology, this book proposes that much can be achieved by authors uniting and collaborating on their academic work. By doing this, it is argued that green criminology stands to benefit from a discipline that places mother nature at the heart of lawmaking and therefore providing a solution to the environmental harms identified by green criminologists. Furthermore, earth jurisprudence will profit from utilising the breadth of academic work produced within the green criminology academic arena. Therefore, this book seeks to unite green criminology and earth jurisprudence in an effort to find solutions to the extraordinary environmental problems that the world now faces.

**Wann wenn nicht wir\*: ein extinction rebellion Handbuch**

**Item Type** Book  
**Editor** Sina Kamala Kaufmann  
**Editor** Michael Timmermann  
**Editor** Annemarie Botzki  
**Editor** Steffen Greiner  
**Translator** Ulrike Bischoff

**Abstract** Extinction Rebellion (XR) ist eine Bewegung, die in England entstanden ist. Im April 2019 legte sie London mehrere Tage lahm, gab der Innenstadt mit Straßen- und Brückenblockaden ihr eigenes Tempo und ihre eigenen Farben - das Pink der Rebellion. Ziel ist es, mit Mitteln des gewaltfreien zivilen Ungehorsams auf die existentielle Krise - das sich rasant ausbreitende Artensterben, was auch uns Menschen erfasst - aufmerksam zu machen und einen Systemwandel herbeizuführen. Das Buch versammelt Fakten über bereits sichtbare Folgen der Klimakrise und ruft zum Handeln auf. Für alle nachvollziehbar, konkret und undogmatisch erklärt es, wie sich das Rebellieren organisieren lässt: Von der gewaltfreien Kommunikation über das Errichten von Straßenblockaden und die Vorbereitung anderer Protestaktionen bis hin zum Kochrezept für mehrere hundert Menschen. Die XR-Aktivisten Sina Kamala Kaufmann, Annemarie Botzki und Michael Timmermann ordnen XR in den deutschen Kontext ein und ergänzen das Buch um wichtige und konkrete Informationen für das Rebellieren in Deutschland. Jeder kann Teil der Bewegung werden – und zusammen können wir Geschichte schreiben. Dies ist erst der Anfang
