The Panel on Planetary Thinking provides scientific support for the development of concepts and strategies in the field of sustainability at Gießen University since 2020. It functions as a research-oriented think tank that draws on the interdisciplinary expertise of top JLU scientists to strengthen a university-wide perspective in the field of sustainability.

The Panel on Planetary Thinking currently seeks applications for a

**Research Assistant (Wissenschaftliche Hilfskraft)
20h/month (for 12 months)**

starting at the earliest possible date

Responsibilities

- Literature research
- Database development
- Preparation of presentations

Qualifications

- Master's degree in a field related to contemporary history, the history of ideas, and/or international relations
- Strong interest in the research topics of the Panel on Planetary Thinking
- Basic expertise in interdisciplinary sustainability research (e.g. Anthropocene)
- Excellent English and German language skills
- Proficient computer-based skills (e.g. Zotero, STATA, R, MS Office, SPSS)

Requirements

- Independent way of working and personal initiative
- Goal-oriented and systematic approach
- Ability to quickly familiarize oneself with new topics

We offer you insights in the development of an interdisciplinary initiative with great opportunities in expanding your own research competences due to a network of internationally renowned scholars and artists. The working hours are flexible and to be completed remotely.

The deadline for application is 29. March 2023. If you have any further questions regarding the position, please contact Katharina Endres. Please send your application, including a letter of motivation and a CV with your latest certificates, as one single .pdf-file to katharina.endres@planet.uni-giessen.de.
