Abstract

Dr. Rinaldo Raccichini is a Senior Editor at Nature Communications, where he handles manuscripts in the broad field of electrochemical energy storage (e.g., secondary batteries, supercapacitors, hybrid devices). In his talk entitled “Understanding the editorial process at Nature journals”, he will discuss what the Nature journals editors look for in the papers they want to publish, the key editorial differences between Nature, the Nature Research Journals, and Nature Communications, how to write a paper that deserves to be published in a Nature journal and how the Nature journals editors make decisions on what they publish.
