

Fact Sheet 1

Center for international Development and Environmental Research

1 Strong Focus on Critical Sustainability Topics

- Land use: we apply a systems approach connecting land use with food, environment, and socio-economic structures
- Climate and Environment: we study changes in the earth system driven by human activities and physical processes and their governance
- One Health: we analyze intricate relationships between human, animal, and environmental health to tackle complex health challenges

2 Long Track Record

Established in 1998, ZEU has conducted more than 80 interdisciplinary projects. In addition, it has successfully facilitated the attainment of doctoral degrees for 50 employees.

3 International Reach

ZEU's research is grounded in global cooperation, with many projects carried out in close partnership with institutions and researchers in the Global South.

4 Interdisciplinary Research Platform

ZEU brings together researchers from diverse disciplines to work collaboratively on some of today's most pressing global challenges. If you're motivated by topics like land-use transformation, climate change, One Health and the SDG next, ZEU offers the ideal environment to engage in truly cross-cutting, solution-oriented research.
