# UNIVERSITIES IN GERMANY

1. A full University offers study programs in basically all fields of study
2. Technical Universities are specialized in technical programs (e.g. engineering) but also offer other non-technical study programs
3. Art Schools specialize in art, music, architecture or theatre. Usually, they do not offer other study programs
4. Universities of Applied Sciences offer a wide range of programs. Their teaching approach is less scientific and more practical compared to universities.

# UNIVERSITIES IN GERMANY

Colleges, schools or universities can be

- state-run (e.g. Justus Liebig University, Phillips University Marburg, ...)
- private (e.g. Frankfurt Business School, ...)
- church-run (e.g. Giessen School of Theology, ...)

# FIELDS OF STUDY

# CURRICULUM

- In Bachelor, Master and some State Examination programs, classes are offered as part of modules
  - modules bundle together classes sharing a thematic and/or methodological approach.
  - modules usually consist of two or three different classes.
  - module contents, kinds of examinations and learning goals are codified.

**Exchange students usually do not have to pay attention to module structures. But sometimes, there are practical classes that must go together with lectures. Please check with your study advisor.**

**International students studying an entire program at Justus Liebig University must pay attention to module structures in order to successfully complete their studies.**

# CURRICULUM

- For each class, there is a pre-defined workload. The workload for a class is the sum of the hours of work spent for the respective class. It includes class participation and preparations for classes and examinations.
- 30 hours of work = 1 CP / ECTS point
- Credit points thus measure the *quantitative* workload students must spend for their classes.
- Additionally, for a successfully completed class, you will be awarded grades, which measure the *qualitative* success of a class.
