

Module Directory

Faculty 09 - Agricultural Sciences, Nutritional Sciences and Environmental Management

"Insect Biotechnology and Bioresources" Master Degree Course Modules

Please consult the timetable or current university calendar for information regarding dates and room numbers of the modules taught in the course:

<http://www.uni-giessen.de/cms/fbz/fb09/studium/msc/stpl>

Core Modules	4
MK-002-EN Applied Statistics.....	4
MK-087-EN Natural Product Chemistry	6
MK-088-EN Entomology I.....	7
MK-089-EN Insect Biotechnology and Integrated Pest Management.....	8
MK-090-EN Bioresources for Natural Product Discovery.....	9
MK-091-EN Entomology II.....	11
MK-092-EN Food Technology.....	12
MK-093-EN Bioprocess Engineering.....	13
MK-116-EN Principles of Scientific Practice	15
Profile Modules	16
MK-015-EN Plant Protection and Bioengineering	16
MK-016-EN Biotechnology and Genomics	17
MK-018-EN Microbial Food Biotechnology	18
MK-057-EN Molecular Phytopathology.....	20
MK-067-EN-DI Theory and Practice of Economic Development	21
MK-068-EN Empirical Research Methods	22
MK-070-EN Business Administration and Sustainability Management.....	23
MK-080-EN-DI Resource Economics and Sustainable Development.....	24
MK-107-EN-DI Natural Resources and Ecosystem Services	25
MK-108-EN-DI Renewable Energy Transition.....	26
MK-110-EN-DI Food Politics	27
MK-116-EN Principles of Scientific Practice	29
MK-127-EN Socio-Economic Perspectives on Food Systems.....	30
MP-007-EN Food and Nutrition Security and Development	32
MP-020-EN Plant Breeding for Resistance and Quality Breeding	34
MP-029-EN Plant-Microbe Interactions	35
MP-075-EN Host-Intestine-Microbe Interactions.....	36
MP-090-EN Biotechnology for Pest Control	37
MP-097-EN Microbial Diagnostics.....	38
MP-098-EN Molecular Plant Breeding.....	39
MP-149-EN Molecular Techniques.....	40
MP-150-EN Milestones of Insect Biotechnology & Bioresources.....	41
MP-151-EN Antibiotics: Present, Past and Future.....	42
MP-153-EN Food Analysis	43
MP-156-EN Laboratory Course I.....	44
MP-157-EN Laboratory Course II.....	45
MP-158-EN Insects for Food and Feed Production Systems	46
MP-163-EN-DI Python for Environmental Scientists	47

MP-175-EN Effect-directed Analysis by HPTLC-Assay-HRMS	48
MP-196 Internship.....	50
MP-208-EN-DI Concepts of Ecological Economics.....	51
MP-209-EN Field-Work based Research in Socio-Economics.....	52
MP-214-EN Econometrics and Modelling Applications.....	54
MP-215-EN Regulation of Agricultural Value Chains.....	55
MP-222-EN Introduction to International Trade.....	56
MP-227-EN Biodiversity Monitoring with Molecular Tools.....	57
MP-230-EN-DI Sustainable Plant Protection	58
MP-234-EN Crop Abiotic Stresses	59
MP-235-EN Practical Genome Sequencing and Bioinformatics	60
MP-236-EN Quantitative Genetics	61
MP-240-EN Statistical Learning	62
MP-246-EN Transition to a Sustainable Bioeconomy.....	63
MP-248-EN Fruit Breeding	64
MP-252-EN-DI Sustainable Water Management.....	65
THM-01-EN Pharmaceutical Basics	67
THM-02-EN Quality Management.....	69
THM-04-EN Selected Chapters of Pharmaceutical & Industrial Biotechnology	70

Core Modules

MK-002-EN	MK-002-EN Applied Statistics	6 CP
	Applied Statistics	
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agronomy and Plant Breeding II	1./2. Sem.;
	Offered for the first time: WS 2015/16	
	Intake capacity: not limited	
Frequency and Duration: WS, 1 semester		
Module Coordinator: Chair of Biometry and Population Genetics		
Applies to the Study Programmes: Agrobiotechnology, Master (1./2.); Insect Biotechnology and Bioresources, Master (1./2.);		
Prerequisites for Participation: None		
Learning Outcomes: The Students <ul style="list-style-type: none"> • have knowledge of statistical methods; • have knowledge of experimental designs; • are able to analyse experiments and studies. 		
Module Content: <ul style="list-style-type: none"> • Analysis of variance • Comparison of treatments • Mixed linear models • Experimental designs • Data analysis using statistical software 		

Forms of Instruction:	Contact hours	Preparation and follow-up work
Lecture	30	60
Seminar		
Practical training	30	60
Exercises		
Excursion		
Total:	180	
Prerequisites for Examination: None		
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Assignments (4) or written examination • Components of final grade: Assignments (100 %) or written examination (100 %) • Form of module retake examination: Written examination 		
Language: English		

MK-087-EN	MK-087-EN Natural Product Chemistry		6 CP
	Natural Product Chemistry		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Insect Biotechnology		1. Sem.;
	Offered for the first time: WS 2017/18		
	Intake capacity: 30		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Natural Substance Research with a Focus on Insect Biotechnology			
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (1.);			
Prerequisites for Participation: None (recommended: knowledge in organic chemistry)			
Learning Outcomes: The students <ul style="list-style-type: none"> • have comprehensive insight into the chemistry of organic natural products; • know the most important classes of natural products, including their biosynthesis, important structural and chemical features as well as bioactivities. 			
Module Content: <ul style="list-style-type: none"> • Bioresources (=origin), biosynthesis, ecophysiological role, and practical importance of natural products, thereby emphasizing insect-derived and 'anti-insect' compounds • classes of natural products (carbohydrates, lipids, polyketides, phenylpropanoids, terpenes, peptides (non-ribosomally and ribosomally synthesized), and alkaloids) as well as their biosynthesis and important features (structure-activity relationships, toxicity) • Methods section: Introduction to production/fermentation, isolation, purification of natural products (several (column) chromatographic techniques, especially HPLC), and structure elucidation 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	30	60	
Seminar	30	60	
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination and presentation (10-15 min.) • Components of final grade: Written examination (60 %), presentation (40 %) • Form of module retake examination: Written examination or oral examination 			
Language: English			

MK-088-EN	MK-088-EN Entomology I		6 CP
	Entomology I		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Insect Biotechnology		1. Sem.;
	Offered for the first time: WS 2017/18		
	Intake capacity: 30		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Applied Entomology			
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (1.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • gain fundamental knowledge of insects as a central bioresource; • study insect anatomy and systematics; • know the basics of insect identification and will learn its practical application; • learn techniques of preservation of insect specimens; • understand the basics of evolutionary biology & ecology of insects. 			
Module Content: <ul style="list-style-type: none"> • studies on internal (including dissections) and external insect morphology • microscopy of organ systems • use of insect identification keys with real specimens • evolutionary strategies of insects • insect ecology 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	40	80	
Seminar			
Practical training			
Exercises	20	40	
Excursion			
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination 			
Language: English			

MK-089-EN	MK-089-EN Insect Biotechnology and Integrated Pest Management		6 CP
	Insect Biotechnology and Integrated Pest Management		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Insect Biotechnology		1. Sem.;
	Offered for the first time: WS 2017/18		
	Intake capacity: 40		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Insect Biotechnology in Plant Protection			
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (1.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • have important knowledge in various methods of biological pest control (including classical biological control, inundative releases, etc.); • have competencies in biology and ecology as well as the use of physical and microbiological control procedures; • know the basic principles of important biotechnological plant protection strategies; • can assess how and to what extent individual techniques can be used within the framework of IPM strategies; • can independently compile, summarize, and present literature on a given topic in a lecture 			
Module Content: <ul style="list-style-type: none"> • The legal basis of integrated and biological plant protection • Biology and ecology of agricultural pests and entomopathogens and their application possibilities in crop protection (production and application technology) • Case studies on methods of classical biological pest control, inundative releases of antagonists (in the field and greenhouse), sterile insect technology and strategies for the promotion of natural enemies in agricultural ecosystems • Use of pheromones (monitoring, mass capture, confusion, lure and kill) and other biotechnological plant protection methods in agriculture 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	44	88	
Seminar	8	16	
Practical training			
Exercises			
Excursion	8	16	
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination and presentation (10-20 min. + discussion 5-10 min.) • Components of final grade: Written examination (50%), presentation (50%) • Form of module retake examination: Written examination or oral examination 			
Language: English			

MK-090-EN	MK-090-EN Bioresources for Natural Product Discovery	6 CP
	Bioresources for Natural Product Discovery	
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Insect Biotechnology	2. Sem.;
	Offered for the first time: SS 2018	
	Intake capacity: 30	
Frequency and Duration: SS, 1 Semester		
Module Coordinator: Chair of Natural Substance Research with a Focus on Insect Biotechnology		
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (2.);		
Prerequisites for Participation: None		
Learning Outcomes: The students <ul style="list-style-type: none"> • gain insights into suitable bioresources for natural product discovery approaches and how discovery pipelines are set-up (biological activity-based platforms versus modern genomics / bioinformatics-driven pipelines); • get knowledge in currently used and emerging natural product-producing microorganisms and their application in pharmaceutical, agricultural and food industry; • acquire knowledge in the industrial value chain from spanning early discovery programs up to lead candidate identification and lead development; • get experience in the application of bioinformatic tools for biosynthetic gene cluster identification; • get insights into recent literature and acquire skills in selecting and presenting publications as well as other data in seminars. 		
Module Content: <ul style="list-style-type: none"> • Systematics, biology, and ecology of microorganisms producing natural products • Examples of plant-derived natural products • Examples of natural products biosynthesis in microorganisms (physiology, gene regulation) • From bioresource to product: Strategies to select and exploit bioresources for natural product discovery • Principles and application of biological detection systems and their application in academic and industrial screening systems • Target identification and target-based screening systems • Analytical platforms in natural product identification • Connection of gene clusters and metabolites: modern approaches for drug discovery • Lead identification and strategies for lead development • Seminar on recent approaches in drug discovery • Demonstration / hands on training to gain insights into bioinformatics tools in drug discovery (using the antiSMASH platform as an example to exploit genome sequence information) 		

Forms of Instruction:	Contact hours	Preparation and follow-up work
Lecture	42	84
Seminar	9	18
Practical training		
Exercises	9	18
Excursion		
Total:		180
Prerequisites for Examination: None		
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination, presentation (10-15 min.) and project work (group work: preparation of a video tutorial, 4-10 min) • Components of final grade: Written exam (50 %), presentation (40 %), project work (10 %) • Form of module retake examination: Written examination or oral examination 		
Language: English		

MK-091-EN	MK-091-EN Entomology II		6 CP
	Entomology II		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Insect Biotechnology		2. Sem.;
	Offered for the first time: SS 2018		
	Intake capacity: 30		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Applied Entomology			
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (2.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • gain in-depth knowledge on insect anatomy; • broaden their knowledge on insect systematics; • increase their skills in insect identification; • understand concepts of insect physiology; • understand insect adaptations to environmental pressures; • extend their knowledge about insect ecological strategies. 			
Module Content: <ul style="list-style-type: none"> • microscopic studies on histological sections of insect tissues • identification of specimens on family and species level • specific taxonomic techniques • insect physiology (including development) • examples and concepts how insects adapt to their environment • insect feeding strategies (including field observations) 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	28	56	
Seminar			
Practical training			
Exercises	24	48	
Excursion	8	16	
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination 			
Language: English			

MK-092-EN	MK-092-EN Food Technology		6 CP
	Food Technology		
Core Module / Optional Module	Biology and Chemistry / Institute of Food Chemistry and Food Biotechnology		2. Sem.;
	Offered for the first time: SS 2019		
	Intake capacity: 30		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Working group for biochemical and molecular biological food analytics and biotechnology			
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (2.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • master basic engineering and bioprocess principles relevant to the food industry • know special separation techniques • understand the basic principles of the processing of animal and plant food • can perform basic food biotechnological processes • are able to analyze and assess parameters relevant in processes of food biotechnology 			
Module Content: <ul style="list-style-type: none"> • Cereal technology • Production of sugar and confectionery • Techniques to produce fats and oils • Production processes of food additives • Food Biotechnology • Basics in insect rearing and downstream processing • Fermented asiaon food 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	30	50	
Seminar	10	20	
Practical training	30	40	
Exercises			
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination or oral examination 			
Language: English			

MK-093-EN	MK-093-EN Bioprocess Engineering	6 CP
	Bioprocess Engineering	
Core Module / Optional Module	THM / Institute of Bioprocess Engineering and Pharmaceutical Technology	2. Sem.;
	Offered for the first time: SS 2019	
	Intake capacity: 30	
Frequency and Duration: SS, 1 Semester		
Module Coordinator: Chair of of Bioprocess Engineering		
Applies to the Study Programmes: Insect Biotechnology and Bioresources, Master (2.);		
Prerequisites for Participation: None		
<p>Learning Outcomes: Lecture/Exercises: The students show competences in:</p> <ul style="list-style-type: none"> • basics concerning prokaryotic and eukaryotic cells and enzymes in biotechnological processes • essential mathematical model concepts to gather cell growth and metabolism • special aspects of fermentation processes and bioreactors • basics of essential unit operations of downstream processes • basic possibilities of process design, characterization, description, and monitoring in up- and downstream of biotechnological production processes <p>Lab work: The students learn:</p> <ul style="list-style-type: none"> • the handling of bioreactors and their tools within the concept and application of cellular/ microbial cultivations • application of essential bioanalytical methods for cell growth and metabolism analysis • concepts of downstream operations 		
<p>Module Content: Lecture/Exercises:</p> <ul style="list-style-type: none"> • Industrial application of microbial and cell cultures, enzymes • Process kinetics • Batch-, Fed-batch and continuous processes, models and kinetics • Heat and mass transfer including the combination with biological reactions • Bioreactors and their choice • Sterilisation: technologies, construction, hygienic design • Methods of cell separation and product purification (lysis, sedimentation, centrifugation, filtration, chromatography, extraction) <p>Lab work:</p> <ul style="list-style-type: none"> • Bioreactor cultivation including process monitoring • Exemplary downstream processing with various tools • Presentation and discussion of results within the seminar 		

Forms of Instruction:	Contact hours	Preparation and follow-up work
Lecture	30	60
Seminar		
Practical training	20	40
Exercises	10	20
Excursion		
Total:		180
Prerequisites for Examination: None		
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination 		
Language: English		

MK-116-EN	MK-116-EN Principles of Scientific Practice		6 CP
	Principles of Scientific Practice		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agronomy and Plant Breeding I		1. Sem.; 2. Sem.;
	Offered for the first time: SS 2021		
	Intake capacity: not limited		
Frequency and Duration: WS and SS, 1 Semester			
Module Coordinator: Chair of Agrobioinformatics			
Applies to the Study Programmes: Agrobiotechnology, Master (1.); Insect Biotechnology and Bioresources, Master (2.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • understand principles of scientific methods, scientific recording and scientific reporting; • are able to formulate testable research hypotheses and design experiments to answer scientific questions; • understand requirements and reporting standards for statistical analysis; • understand how to generate and communicate scientific knowledge; • are familiar with guidelines for good scientific practise; • are able to locate reliable, quality-assured information representing the accepted status quo in regard to a specific scientific question; • are able to correctly use and cite scientific sources in written work and presentations. 			
Module Content: <ul style="list-style-type: none"> • Scientific methods • Scientific hypotheses • Experimental design • Generation, recording and communication of scientific knowledge • Good scientific practice • Types and sources of scientific information 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	30	60	
Seminar	10	20	
Practical training			
Exercises	20	40	
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination or oral examination • Components of final grade: Written examination (100% or oral examination (100 %) • Form of module retake examination: Written examination or oral examination 			
Language: English			

Profile Modules

MK-015-EN	MK-015-EN Plant Protection and Bioengineering		6 CP
	Plant Protection and Bioengineering		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Phytopathology		1./2. Sem.;
	Offered for the first time: WS 2015/16		
	Intake capacity: not limited		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Phytopathology			
Applies to the Study Programmes: Agrobiotechnology, Master (1./2.);			
Prerequisites for Participation: None (recommended: Basic knowledge in plant pathology and molecular biology)			
Learning Outcomes: The Students <ul style="list-style-type: none"> • are able to understand and evaluate industrial strategies for disease control; • have experience with basic biotechnological processes, such as tissue culture, high-throughput screening and pesticide applications; • have a conception of the implementation impacts of plant biotechnology; • have a command of the most important transformation techniques in the production of genetically modified plants; • have a theoretical background of the biological mechanism modern plant protection is based on. 			
Module Content: <ul style="list-style-type: none"> • transgenic plants • agronomically significant genes • biotechnological disease control techniques • tissue techniques and tissue cultures • high-throughput screening methods • industrial strategies in plant protection 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	40	70	
Seminar	30	40	
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination and presentation (10-20 min.) • Components of final grade: Written examination (75 %) and presentation (25 %) • Form of module retake examination: Oral examination or written examination 			
Language: English			

MK-016-EN	MK-016-EN Biotechnology and Genomics		6 CP
	Biotechnology and Genomics		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agronomy and Plant Breeding I		2. Sem.;
	Offered for the first time: SS 2016		
	Intake capacity: not limited		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Plant Breeding			
Applies to the Study Programmes: Agrobiotechnology, Master (2.);			
Prerequisites for Participation: None (recommended: Knowledge of molecular genetics)			
Learning Outcomes: The students <ul style="list-style-type: none"> • have deep theoretical knowledge about genome analysis methods methods, with an emphasis on plant genome mapping and gene expression techniques; • gain insight into the practical applications of biotechnological and molecular genetic methods in plant breeding; • have the necessary theoretical background to apply experimental molecular genetics, biotechnological and gene technological methods in plant breeding. 			
Module Content: <ul style="list-style-type: none"> • Molecular and cellular plant genetics • Methods and techniques of experimental biotechnology and genome analysis • Molecular plant breeding: Structure and function of plant genomes, molecular markers, genome mapping, QTL analysis, gene cloning techniques, gene expression methodology • Methods of gene technology in plant breeding: Gene isolation, gene transfer (transformation techniques), detection methods 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	50	70	
Seminar			
Practical training			
Exercises			
Excursion	20	20	
Total:		160	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination and seminar paper (4 pages) • Components of final grade: Written examination (80%), seminar paper (20%) • Form of module retake examination: Written examination 			
Language: English			

MK-018-EN	MK-018-EN Microbial Food Biotechnology	6 CP
	Microbial Food Biotechnology	
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Applied Microbiology	2./4. Sem.;
	Offered for the first time: SS 2016	
	Intake capacity: 30	
Frequency and Duration: SS, 1 Semester		
Module Coordinator: Chair of Microbiology of Recycling Processes		
Applies to the Study Programmes: Agrobiotechnology, Master (2./4.);		
Prerequisites for Participation: None		
Learning Outcomes: Students <ul style="list-style-type: none"> • will have knowledge of the industrial microbiological processes employed in industrial settings, including genetic engineering applications; • be familiar with advanced application-oriented microbiological methods within the scope of industrial microbiology; • know basic and advanced microbiological and molecular techniques for control purposes. 		
Module Content: <ul style="list-style-type: none"> • food fermentations, Selected examples: Dairy products, wine, beer, fermented vegetables • microbial production systems, Vinegar, citric acid, acetone, amino acids as primary products of microbial metabolism • antibiotics, toxins (e.g. as insecticides) as secondary products of microbial metabolism • microbial transformation and biocatalysis • genetic engineering of microorganisms for optimal production • foodborne pathogenic bacteria, Selected examples: Salmonella, enterohemorrhagic bacteria, Clostridium • epidemiology of foodborne illness • Insects and other vectors for microbial spoilage • Inhibition of microbial growth by physical or chemical methods • Diagnostics in the food quality control (microbial contamination), micro- and molecular microbiological methods (selective pathogen cultivation), phylogenetic identification (Sangersequencing, 16S rRNA gene sequence analysis), epidemiological analysis of pathogens (MLST), resistance profiling, determination of toxicity and virulence genes, quantitative PCR, Salmonella diagnostics 		

Forms of Instruction:	Contact hours	Preparation and follow-up work
Lecture	30	60
Seminar		
Practical training	30	60
Exercises		
Excursion		
Total:	180	
Prerequisites for Examination: None		
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination and report of the practical exercises (5-7 pages) • Components of final grade: Written examination (80 %), report of the practical exercises (20 %) • Form of module retake examination: Written examination 		
Language: English		

MK-057-EN	MK-057-EN Molecular Phytopathology		6 CP
	Molecular Phytopathology		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Phytopathology		1. Sem.; 1./2. Sem.;
	Offered for the first time: WS 2015/16		
	Intake capacity: not limited		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Phytopathology			
Applies to the Study Programmes: Agrobiotechnology, Master (1.); Nutzpflanzenwissenschaften, Master (1./2.); Oenologie, Master (1./2.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • have in-depth knowledge of the biochemical and molecular basis on host-parasite interactions; • are able to describe the structure and function of the plant's immune system of model plants; • are able to discuss possible means by which plants and their parasites coevolved. 			
Module Content: <ul style="list-style-type: none"> • cytological, biochemical and molecular biological foundations background on host-parasite interactions • mechanisms of plant defensive reactions • structure and function of resistance and virulence genes • principles of modern disease control processes on the basis of induced resistance and genetic engineering techniques • effector biology, PAMP-triggered immunity, effector triggered immunity 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	60	120	
Seminar			
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Oral examination or written examination 			
Language: English			

MK-067-EN-DI	MK-067-EN-DI Theory and Practice of Economic Development		6 CP
	Theory and Practice of Economic Development		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agricultural Policy and Market Research		1. Sem.;
	Offered for the first time: WS 2021/22		
	Intake capacity: not limited		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Agricultural, Food and Environmental Policy			
Applies to the Study Programmes: Transition Management, Master (1.); Sustainable Transition, Master (1.);			
Prerequisites for Participation: None			
Learning Outcomes: Students <ul style="list-style-type: none"> • are familiar with key concepts for analysing economic development. • are able to apply them to a range of current development topics. • are aware of the role of natural resources and institutions in the process of development. • consider economic development as a multidisciplinary topic and are enabled to integrate viewpoints from neighbouring social sciences into a problem-centred approach 			
Module Content: <ul style="list-style-type: none"> • Models of growth & development • Trade & globalisation • Development strategy & industrial policy • Resource curse • Land tenure • Environment & the commons • Institutions & development 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	60	120	
Seminar			
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination and assignments (5-10) or assignments (5-10) • Components of final grade: Written examination (40 %), assignment (60 %) or assignment (100 %) • Form of module retake examination: Written examination and assignments (5-10) or assignments (5-10) 			
Language: English			

MK-068-EN	MK-068-EN Empirical Research Methods		6 CP
	Empirical Research Methods		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agricultural Policy and Market Research		1. Sem.;
	Offered for the first time: WS 2015/16		
	Intake capacity: not limited		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Agricultural, Food and Environmental Policy			
Applies to the Study Programmes: Transition Management, Master (1.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • have acquired knowledge of general principles of various qualitative and quantitative research methods as well as evaluation research • are able to understand the application of various methods with regard to research objectives 			
Module Content: <ul style="list-style-type: none"> • Principles of applied statistics • Correlation and causality • Basic approach of econometrics • Basic introduction to simple and multiple regression analysis • Collecting and analysing panel data • Designing of surveys, interviews, questionnaires • Qualitative data collection techniques • Qualitative data analysis • Mixed methods 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	30	60	
Seminar	30	60	
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisites for Examination: Written examination or written examination, seminar paper (4-5 pages) and poster			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination (100 %) or written examination (70 %), seminar paper (15 %), poster (15 %) • Components of final grade: Written examination • Form of module retake examination: 			
Language: English			

MK-070-EN	MK-070-EN Business Administration and Sustainability Management		6 CP
	Business Administration and Sustainability Management		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Business Administration of the Agricultural and Food Sector		2. Sem.;
	Offered for the first time: SS 2016		
	Intake capacity: 50		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Agricultural Production Economics			
Applies to the Study Programmes: Transition Management, Master (2.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • are familiar with basic and advanced methods of business accounting; • are able to model managerial decision problems by adequate cost-benefit calculations and other methods of Operations Research; • understand the global sustainability challenges of the 21st century; • are able to define economic, social and governance (ESG) risks of companies in different contexts; • can include ESG factors in a company strategy with bases on the context and expectations of the stakeholders. 			
Module Content: <ul style="list-style-type: none"> • Internal and external business accounting • Analysis of production functions and marginal effects calculus • Optimisation with constraints • Linear Programming 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	36	72	
Seminar			
Practical training			
Exercises	24	48	
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100%) • Form of module retake examination: Written examination 			
Language: English			

MK-080-EN-DI	MK-080-EN-DI Resource Economics and Sustainable Development		6 CP
	Resource Economics and Sustainable Development		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agricultural Policy and Market Research		1./2. Sem.; 2. Sem.;
	Offered for the first time: SS 2022		
	Intake capacity: not limited		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Agricultural, Food and Environmental Policy			
Applies to the Study Programmes: Agrar- und Ressourcenökonomie, Master (1./2.); Sustainable Transition, Master (2.);			
Prerequisites for Participation: None			
Learning Outcomes: The Students <ul style="list-style-type: none"> • know basic management/decision rules of optimal resource use; • understand the concepts of static and dynamic efficiency of resource use; • understand the concept and the meaning of externalities; • understand the theoretical concepts of sustainability and optimal use of (non-) renewable resources; • know the characteristics of energy/electricity markets with fossil and renewable energies; • are familiar with the current climate and energy policy. 			
Module Content: <ul style="list-style-type: none"> • Natural resources • Renewable and non-renewable resources • The sustainability problem • Sustainable economic development • Static and dynamic efficiency • Overview of energy markets with renewable energies • Electricity and its technical and economic characteristics • Climate change and climate policy (emissions trading) 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	60	120	
Seminar			
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Assignments (4-8) or written exam or written exam and assignments (4-6) • Components of final grade: Assignments (100 %) or written exam (100 %) or written exam (50 %), assignments (50 %) • Form of module retake examination: Assignments (4-6) or oral examination 			
Language: English			

MK-107-EN-DI	MK-107-EN-DI Natural Resources and Ecosystem Services		6 CP
	Natural Resources and Ecosystem Services		
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Landscape Ecology and Resources Management		2. Sem.;
	Offered for the first time: SS 2019		
	Intake capacity: 30		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Landscape, Water and Biogeochemical Cycles			
Applies to the Study Programmes: Sustainable Transition, Master (2.);			
Prerequisites for Participation: None (Basic knowledge of environmental processes and GIS recommended)			
Learning Outcomes: The students <ul style="list-style-type: none"> • understand the concept of ecosystem services; • know how to estimate ecosystem services using InVEST; • are able to assess and evaluate natural resources with regard to multiple ecosystem services for an individual project. 			
Module Content: <ul style="list-style-type: none"> • Introduction to the concept of supporting, regulating, provisioning and cultural ecosystem services • Identification and understanding of multiple ecosystem services provided by different ecosystems • Repetition of GIS software • Learning how to use and analyse spatial datasets with InVEST • Evaluate and use results in the frame of a decision support analysis 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	20	40	
Seminar			
Practical training			
Exercises	40	80	
Excursion			
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Seminar paper (5 - 7 pages) and presentation (10 - 15 min) • Components of final grade: Seminar paper (70 %), presentation (30 %) • Form of module retake examination: Revision of the seminar paper or oral examination 			
Language: English			

MK-108-EN-DI	MK-108-EN-DI Renewable Energy Transition		6 CP
	Renewable Energy Transition		
Core Module / Optional Module	Mathematics and Computer Science, Physics, Geography / Physics		2. Sem.;
	Offered for the first time: SS 2022		
	Intake capacity: 30		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Physics			
Applies to the Study Programmes: Sustainable Transition, Master (2.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> acquire basic physics knowledge about energy production, transport, storage and consumption using fossil, nuclear and renewable sources understand the options and problems of various energy systems, including their impact on global climate and the global carbon and water cycles gain in-depth knowledge of renewable energy systems and their elements know how to identify and address challenges in the transition phase of energy systems that are related to socio-economic and cultural factors 			
Module Content: <ul style="list-style-type: none"> energy usage and conversion fossil and nuclear power plants climate change and acidification of oceans potential of wind, solar, hydro and geothermal energies energy transport and storage interference of energy sectors for industrial, residential, thermal and mobility applications socio-economic and cultural aspects and challenges related to energy scarcity and energy system transitions

MK-110-EN-DI	MK-110-EN-DI Food Politics	6 CP
	Food Politics	
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Consumer Research, Communication and Food Sociology	2. Sem.;
	Offered for the first time: SS 2022	
	Intake capacity: 30	
Frequency and Duration: SS, 1 Semester		
Module Coordinator: Chair of Food Sociology		
Applies to the Study Programmes: Sustainable Transition, Master (2.);		
Prerequisites for Participation: none		
<p>Learning Outcomes: The students</p> <ul style="list-style-type: none"> • understand historical developments of public debates in the arena of food and politics and thereby develop the ability to question norms, practices and opinions and to take an own position in the sustainability discourse; • distinguish the political and moral meaning of food to reflect their own role in local communities and global society; • analyse problems and developments around consumption, production and regulation in food systems to identify and understand relationships; • formulate an argument about a specific food problem in order to understand and reflect on the norms and values underlying actions. A special focus lies on sustainability-related values, principles and goals, being able to negotiate them in the context of conflicts of interest and necessary compromises, of uncertain knowledge and contradictions; • critically reflect the approaches of various actors who aim to influence the food system and apply different problem-solving approaches to complex sustainability problems. 		
<p>Module Content: This module introduces you to food as a political issue such as hunger, food security, malnutrition, sustainability, power politics, social justice or cultural identity. Food politics is about the political nature of food from fork to farm as well as from local to global levels. Topics might include:</p> <ul style="list-style-type: none"> • food production safety, labelling, and nutrition; • environmental concerns ranging from organic farming and sustainable agriculture to consumption and waste disposal; • politics of specific foods and foodways (e.g. fast food, genetically modified foods, etc.); • ethics of animal care and vegetarianism as politics of the everyday; • politics of hunger and malnutrition food movements (e.g. slow food movement, food sovereignty movement) and other stakeholders.

MK-127-EN	MK-127-EN Socio-Economic Perspectives on Food Systems	6 CP
	Socio-Economic Perspectives on Food Systems	
Core Module / Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agricultural Policy and Market Research	1./2. Sem.;
	Offered for the first time: SS 2023	
	Intake capacity: not limited	
Frequency and Duration: SS, 1 Semester		
Module Coordinator: Chair of Agricultural, Food and Environmental Policy		
Applies to the Study Programmes: Nachhaltige Ernährungswirtschaft, Master (1./2.);		
Prerequisites for Participation: None		
Learning Outcomes: The students <ul style="list-style-type: none"> • know the many representations and definitions of food systems; • understand the conceptual difference between value chains and food system; • understand the analytical consequences of a system representation of human nutrition systems; • know the current streams of economic thinking applied to food systems; • know the current streams of socio-political thinking applied to food systems; • know indicators for assessing the sustainability of food systems; • have knowledge of the theoretical approaches to alternative nutrition systems. 		
Module Content: <ul style="list-style-type: none"> • Introduction to food systems: a small history of the concept • Food Systems as socio-ecological systems • Modeling food systems • Economics and food systems • Feminist economics, food systems and nutrition • Food systems, food sovereignty and justice • Alternative and decolonizing food systems • In pursuit of sustainable food systems

MP-153-EN	MP-153-EN Food Analysis		6 CP
	Food Analysis		
Optional Module	Biology and Chemistry / Institute of Food Chemistry and Food Biotechnology		3. Sem.;
	Offered for the first time: WS 2017/18		
	Intake capacity: 11		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Working group for biochemical and molecular biological food analytics and biotechnology			
Applies to the Study Programmes: Profil Insect Biotechnology and Bioresources, Master (3.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • learn sophisticated analytical procedures used in the working groups of the Institute of Food Chemistry and Food Biotechnology • gain detailed knowledge of analytical quality assurance and GLP • present their research results in form of a protocol 			
Module Content: <ul style="list-style-type: none"> • Research-related methods of modern food chemistry • Food Chemical trace- and other high-performance analytical methods • Electrophoretic techniques • Methods in molecular biology

MP-175-EN	MP-175-EN Effect-directed Analysis by HPTLC-Assay-HRMS	6 CP
	Effect-directed Analysis by HPTLC-Assay-HRMS	
Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Nutritional Sciences	1.-4. Sem.;
	Offered for the first time: WS 2018/19	
	Intake capacity: not limited	
Frequency and Duration: WS, 1 Semester		
Module Coordinator: Chair of Food Sciences		
Applies to the Study Programmes: Profil, Master (1.-4.); Profil englisch, Master (1.-4.);		
Prerequisites for Participation: None		
<p>Learning Outcomes: The students</p> <ul style="list-style-type: none"> • understand possible options and the importance of effect-directed analysis; • know the advantages and disadvantages of the different techniques; • recognise the diversity of in-situ or on-surface assays; • know the streamlined workflow on one plate, i.e. separate complex samples in parallel, detect and characterise active substances; • recognize the highly efficient combination of of high performance thin layer chromatography (HPTLC) coupled with biological and biochemical assays; • can understand the rapid effect-directed profiling of samples (5-15 min per sample); • understand how metabolization of samples and effect-directed profiling of samples can be performed and linked together; • know how to perform adherent human cell assays on-surface; • understand how to go from parallel screening of many samples to molecular formulae of the bioactive compounds on a single plate. 		
<p>Module Content:</p> <ul style="list-style-type: none"> • Theoretical basics of the different options for the performance of effect-directed analysis, • Advantages of coupling the different assays with HPTLC, • Different options for couplings to mass spectrometry (MS), • Training in the HPTLC-UV/Vis/FLD assay-MS workflow using different types of assays: <ol style="list-style-type: none"> 1. Antimicrobial compounds against Gram-negative bacteria via the <i>Aliivibrio fischeri</i> bioassay. 2. Antimicrobial compounds against Gram-positive bacteria via the <i>Bacillus subtilis</i> bioassay 3. Hormonally active compounds via planar yeast estrogen/androgen screens (pYES/pYAS) 4. Multiplex assays to detect and clarify antagonistic and synergistic effects 5. Enzyme inhibition assays for the inhibition of acetylcholinesterase, butyrylcholinesterase, tyrosinase, α- or β-glucosidase, α-amylase and β-glucuronidase 6. Digestion of samples by means of NanoGIT+active 7. Metabolization or toxification/detoxification by the S9 liver enzyme system 8. Adherent human cell assays • Optional lab day with illustration of effect-directed experiments

Applies to the Study Programmes: Profil englisch, Master (1.-4.); Profil, Master (1.-4.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • know quantitative genetic models to decompose the genotypic value; • understand the basics of quantitative inheritance and genome-wide prediction; • understand models of selection theory; • can estimate the expected response to selection. 			
Module Content: <ul style="list-style-type: none"> • Additive, dominance, and epistatic effects • Performance prediction of selection candidates • Estimation of variance components and heritability • Direct selection, indirect selection, multistage selection, index selection 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	30	60	
Seminar			
Practical training	30	60	
Exercises			
Excursion			
Total:		180	
Prerequisites for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Assignments (4) or written examination • Components of final grade: Assignments (100 %) or written examination (100%) • Form of module retake examination: Written examination 			
Language: English			

MP-240-EN	MP-240-EN Statistical Learning		6 CP
	Statistical Learning		
Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agronomy and Plant Breeding II		2.-4. Sem.;
	Offered for the first time: offen		
	Intake capacity: not limited		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Biometry and Population Genetics			
Applies to the Study Programmes: Profil, Master (2.-4.); Profil englisch, Master (2.-4.);			
Prerequisites for Participation: Applied Statistics (MK-002 or MK-002-EN)			
Learning Outcomes: The Students <ul style="list-style-type: none"> • know important methods of statistical learning; • understand their mathematical and probability theoretical basics; • can apply statistical learning methods to data sets. 			
Module Content: <ul style="list-style-type: none"> • Prediction models for qualitative variates • Prediction models for quantitative variates • Model selection • Resampling methods 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	30	60	
Seminar			
Practical training	30	60	
Exercises			
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Assignments (4) or written examination • Components of final grade: Assignments (100 %) or written examination (100%) • Form of module retake examination: Written examination 			
Language: English			

MP-246-EN	MP-246-EN Transition to a Sustainable Bioeconomy		6 CP
	Transition to a Sustainable Bioeconomy		
Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agronomy and Plant Breeding I		1.-4. Sem.;
	Offered for the first time: WS 2022/23		
	Intake capacity: not limited		
Frequency and Duration: WS, 1 Semester			
Module Coordinator:			
Applies to the Study Programmes: Profil, Master (1.-4.); Profil englisch, Master (1.-4.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • have knowledge of origin and evolution of the Bioeconomy; • have insight into genetic and environmental factors influencing primary production in agricultural crops; • have an overview of Knowledge base for biobased value chains; • have an appreciation of Bioeconomy strategies and Policies. 			
Module Content: <ul style="list-style-type: none"> • History and development of bioeconomy: Policies and progress in different countries • Overview of crop types: annual v perennial, C3 v C4 • Biomass yield: potential, attainable and actual with crop modelling • Biomass utilisation cascades: actual and potential • Recent projects running in different countries • Sustainability criteria, life cycle assessment 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	20		
Seminar	10		
Practical training	4		
Exercises			
Excursion	12		
Total:		46	
Prerequisites for Examination:			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: • Components of final grade: • Form of module retake examination: 			
Language: English			

MP-248-EN	MP-248-EN Fruit Breeding		6 CP
	Fruit Breeding		
Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agronomy and Plant Breeding II		1.-4. Sem.;
	Offered for the first time: WS 2022/23		
	Intake capacity: 30		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Biometry and Population Genetics			
Applies to the Study Programmes: Profil, Master (1.-4.); Profil englisch, Master (1.-4.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • have insight into the objectives and peculiarities of fruit breeding; • have knowledge on the origin, evolution and domestication of the most important European fruit species; • have broad application knowledge of processes of species specific breeding programs. 			
Module Content: <ul style="list-style-type: none"> • History, economic significance and methods of fruit breeding • Plant variety protection and marketing of plant material • Phylogenetic origin of important fruit species • The use of genetic resources for fruit breeding • State of the art fruit breeding technologies • Fruit breeding explained with selected examples 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	36	72	
Seminar	6	12	
Practical training	6	12	
Exercises	4	8	
Excursion	8	16	
Total:	180		
Prerequisites for Examination: Written assignment (protocol and questionnaire, 4 pages within 2 weeks)			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination 			
Language: English			

MP-252-EN-DI	MP-252-EN-DI Sustainable Water Management		6 CP
	Sustainable Water Management		
Optional Module	Agricultural Sciences, Nutritional Sciences, and Environmental Management / Department of Agricultural Policy and Market Research		1.-4. Sem.;
	Offered for the first time: WS 2023/24		
	Intake capacity: 30		
Frequency and Duration: WS, 1 Semester			
Module Coordinator: Chair of Agricultural, Food and Environmental Policy			
Applies to the Study Programmes: Profil, Master (1.-4.); Profil englisch, Master (1.-4.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • are able to identify and evaluate advanced literature on current (research?) topics and summarize and present the current state of research; • are able to get involved in scientific discussions and develop them further; • are able to make a critical and well-founded statement on specific topics and can develop them further. 			
Module Content: <ul style="list-style-type: none"> • Water Resources, Water Governance and Management • Water Security: from Concept to Reality • Integrated Water Resources Management: Principles and Instruments • Socio-Technical Aspects of Water Resources Management • Water Management Under Uncertainty: Climate and Water • Transboundary Water Resources Management • Water Diplomacy • Agenda 2030 And SDG 6 (Clean Water and Sanitation) • SDG Interlinkages – Synergies & Tradeoffs 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture			
Seminar	60	120	
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Presentation (15–20 Min.) with written assignment (5–7 pages) or seminar paper (15–20 pages) or written examination and presentation (15–20 Min.) • Components of final grade: Presentation (50 %) with written assignment (50 %) or seminar paper (100 %) or written examination (50 %) and presentation (50 %) • Form of module retake examination: Revision of the written assignment or revision of the seminar paper or oral exam 			
Language: English			

THM-01-EN	THM-01-EN Pharmaceutical Basics	6 CP
	Pharmaceutical Basics	
Core Module/ Optional Module	Fachbereich/Institut	1./3. Sem.;
	Offered for the first time: WS 2017/18	
	Intake capacity: 16	
Frequency and Duration: WS, 1 Semester		
Module Coordinator: ...		
Applies to the Study Programmes: Profil Insect Biotechnology and Bioresources, Master (1./3.);		
Prerequisites for Participation: None		
Learning Outcomes: The students <ul style="list-style-type: none"> • have a basic knowledge in different dosage forms (solid, liquid, semi-solid) • can name properties, characterization and testing of dosage forms • can describe the requirements for medicinal product test according to Pharmacopeia • have an overview of rules and guidelines in the pharmaceutical industry • can name excipients and packing materials • apply to Pharmacopeia und pharmaceutical terms • can interpret laws, Rich lines and standards • designate the fundamentals of quality management 		
Module Content: <ul style="list-style-type: none"> • Fundamentals of drug morphology • Pharmacopeia and other standard work • Drug forms by Pharmacopeia • Excipients and active ingredients • Preparations of medical forms • Testing of the pharmaceutical quality • Fundamentals of quality management • Legal framework: DIN ISO, GMP-guideline • Cycle of quality control • Quality assurance program • Lab: making and testing of several dosage forms 		

Forms of Instruction:	Contact hours	Preparation and follow-up work
Lecture	40	40
Seminar	20	10
Practical training	40	30
Exercises		
Excursion		
Total:		180
Prerequisites for Examination: None		
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination 		
Language: English		

THM-02-EN	THM-02-EN Quality Management		6 CP
	Quality Management		
Core Module/ Optional Module	THM / Institute of Bioprocess Engineering and Pharmaceutical Technology		2./4. Sem.;
	Offered for the first time: SS 2019		
	Intake capacity: 30		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of Pharmaceutical Technology			
Applies to the Study Programmes: Profil Insect Biotechnology and Bioresources, Master (2./4.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • can safely deal with the concepts and definitions of quality management • understand the meaning and importance of quality management • can perform and analyze risk assessments • know how to identify critical process steps • can accompany qualifications and validations in companies • can develop steps for risk reduction 			
Module Content: <ul style="list-style-type: none"> • Basic concepts for risk and quality management • Quality management systems (DIN ISO) • Strategies for handling and managing risks in manufacturing companies • Risk assessment by FMEA, HACCP, Kepner-Tregoe, FTA • Quality-related strategies (TQM, EFQM, TPM, KVP) • Further qualification and validation phases • Internal / external quality audits • certification 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture			
Seminar	45	90	
Practical training			
Exercises	15	30	
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination • Components of final grade: Written examination (100 %) • Form of module retake examination: Written examination 			
Language: English			

THM-04-EN	THM-04-EN Selected Chapters of Pharmaceutical & Industrial Biotechnology		6 CP
	Selected Chapters of Pharmaceutical & Industrial Biotechnology		
Core Module / Optional Module	THM / Institute of Bioprocess Engineering and Pharmaceutical Technology		2./4. Sem.;
	Offered for the first time: SS 2019		
	Intake capacity: 15		
Frequency and Duration: SS, 1 Semester			
Module Coordinator: Chair of of Bioprocess Engineering			
Applies to the Study Programmes: Profil Insect Biotechnology and Bioresources, Master (2./4.);			
Prerequisites for Participation: None			
Learning Outcomes: The students <ul style="list-style-type: none"> • have an overview of currently discussed relevant topics in science and industry in the field of biotechnology • know how to research and present current relevant publications and discuss them within the context of the lecture, classification of potential industrial and social relevance 			
Module Content: <ul style="list-style-type: none"> • currently important topics in pharmaceutical and industrial biotechnology • literature research and presentation of currently relevant topics in pharmaceutical and industrial biotechnology based on publications 			
Forms of Instruction:	Contact hours	Preparation and follow-up work	
Lecture	15	15	
Seminar	30	120	
Practical training			
Exercises			
Excursion			
Total:		180	
Prerequisite for Examination: None			
Module Examination: <ul style="list-style-type: none"> • Form(s) of assessment: Written examination or seminar paper and presentation • Components of final grade: Written examination (100 %) or seminar paper (50 %), presentation (50 %) • Form of module retake examination: Written examination or revision of the seminar paper 			
Language: English
