Profile module internship

The module MP-196 Industrial Internship (Berufspraktikum) can be chosen as a profile module in all Master programmes of Faculty 09.

Please note that this is a different module than the core module MK-019 Industrial Internship in the Master's programme Agrobiotechnology. You can find further information about MK-019 on:

>> <https://www.uni-giessen.de/faculties/f09/studies/internship/mk-019>

The internship must be completed outside the university and independently of other modules and the thesis.

Companies and institutions from the occupational fields of Agricultural Sciences, Nutritional Sciences, Nutrition and Home Economics and Environmental Management, which ensure a qualified supervision of the students, are suitable as internship companies. Internships at public institutions and non-university research institutions are also permitted.

Registration for the internship

If the module MP-196 is included in the profile module plan, the internship is considered a compulsory internship. Registration in the profile module plan is not possible independently via FlexNow but is done via the Study Deanery.

Once you have received a placement, please submit the internship recognition form by email to praktikum@fb09.uni-giessen.de.

>> <https://www.uni-giessen.de/en/faculties/f09/studies/internship/pdf/form-approval-internship.pdf>

If the planned internship fulfils the requirements, it will be approved and a certificate of possible exception from the compulsory social insurance will be issued, for a maximum internship period of 12 months.

Implementation of the internship

The internship amounts to a volume of 12 CP and covers at least 360 hours (equivalent to a full-time employment of at least nine weeks).

A completion of the internship hours may also be possible part-time. Absenteeism, including illness, is to be made up for.

An apportionment of the internship to a maximum of two companies is possible, whereby a section must cover at least 160 hours.

Recognition

After the end of the internship, the following documents must be submitted for recognition:

1. Form about completed internship

>> https://www.uni-giessen.de/fbz/fb09/studium/praktikum/pdf/f_praktikumsnachweis.pdf

2. Internship report (5000-6000 characters) about tasks, activities, knowledge acquired, and relevance for your studies. The internship report must be signed by the company as objectively correct.

>> <https://www.uni-giessen.de/fbz/fb09/studium/praktikum/pdf/vorlage-praktikumsbericht-fb09-en.docx>

Please submit **all documents digitally as PDF documents by e-mail** to praktikum@fb09.uni-giessen.de.

If all documents are complete and have been verified as objectively correct, the effort will be recorded as "passed" in FlexNow. No grade will be awarded for the internship.
