

Workshop

Introduction to the peer review process: A Workshop for early career researchers

Organizational details

Instructor: Professor Dr Elmar Schlüter*
Dates: January 30 & 31, 2020, 9.00 am – 5 pm respectively
Location: Erwin-Stein-Gebäude, room 201, Goethestrasse 58, D-35390 Giessen
ECTS: 3

Objectives

There can be no doubt that peer review is of central importance for scholarly publishing. More technically, peer review serves to evaluate the quality of articles for publication in journals.

Most new academics will sooner or later participate in the peer review process – both as authors and as reviewers. It is thus increasingly important to understand the formal and informal rules of the peer review system. This workshop transmits such theoretical knowledge and practical competences. Some of the core questions we will deal with are: What makes a good research article – and what makes a good peer review? Which types of peer review do exist? Which ethical aspects need to be considered when doing a peer review? What are key points of criticism of the current peer review system? How can I become a peer reviewer?

Content

Participating in this workshop will not only help to conduct high-quality peer reviews, but also to become a better author. Such competencies can be particularly important for new academics who need to prove their merit.

January 30, 2020

9:00-9:15	Welcome & overview
9:15-10:45	Publishing in academia & the peer review process I
11:00-12:30	Publishing in academia & the peer review process II

--- Lunch break ---

13:30-15:00	How to evaluate empirical research articles I
15:15-16:45	How to evaluate empirical research articles II
16:45-17:00	Wrap-up, question & answer

January 31, 2020

9:00-9:15	Welcome & overview
9:15-10:45	How to communicate your findings as a peer reviewer I
11:00-12:30	How to communicate your findings as a peer reviewer II
<i>--- Lunch break ---</i>	
13:30-15:00	Things that can (and do) go wrong...
15:15-16:45	Wrap-up, overview take-home exercises peer review

Methods

This 2-day workshop will comprise both lecture-style input sessions, Q & A rounds as well as hands-on practical exercises such as (a) starting to review an empirical research article and (b) discussing different examples of real peer reviews. You will work both individually and in teams.

To gain the ECTS credit points participants have to:

- Participate actively
- Prepare a peer review (using a training manuscript)

Target group

The workshop primarily targets doctoral candidates and postdocs.

Course language

English
